

Upload Image To IBM Container

Date	11 November 2022
Team ID	PNT2022TMID20463
Project Name	Smart Fashion Recommender Application

CREATING REPOSITORY IN IBM CLOUD:

Create repository

1. Tag an image to point to this registry. Choose a local image, target namespace, and target repository.

```
docker tag <local_image> icr.io/<my_namespace>/<my_repo>
```

2. Push the tagged image.

```
docker push icr.io/<my_namespace>/<my_repo>
```

UPLOAD IMAGE TO IBM CONTAINER REGISTRY:

The screenshot shows the IBM Cloud Container Registry interface. The sidebar on the left contains the following navigation items: Quick start, Namespaces (1), Repositories (1), Images (1), Trash (0), and Settings. The main content area is titled 'Repositories' and features a 'Location' dropdown set to 'Global'. Below this is a search bar and a 'Create' button. A table lists the repositories with the following data:

	Name	Image count	Namespace	Last updated	
▼	ibmproj icr.io/myproj/ibmproj	1	myproj	4 days ago	⋮

At the bottom of the table, there are pagination controls: 'Items per page: 25', '1-1 of 1 item', '1' (dropdown), '1 of 1 page', and navigation arrows.
